The White House  
1600 Pennsylvania Ave  
Washington DC 20500

President Trump:

Re: Keystone Pipeline

Your willingness to re-litigate and approve the Keystone Pipeline project demonstrates your pro-pollution support. The US does not need this oil supply, nor does the rest of the world. It is one of the dirtiest fossil fuel sources in the world.

Your approval is akin to giving a junkie a needle. You are furthering the world's addiction to oil - and deflating an opportunity to develop alternative energy sources.

You're swamping the world with the dirtiest fossil fuel known to man. You're going to be on the wrong side of environmental history. You must be proud of your (and Tillie's) part in hastening climate change as you appeared to do it with so much relish. Sad.
