Washington DC 20500

President Trump:

Re: Environment

Your comments and public statements show no concern for the environment; in fact, you have stated that climate-change is “a hoax perpetrated by the Chinese”. The facts overwhelmingly show that CC is human-affected and that we need to curtail the use of fossil fuels.

Your actions must consider the impact on the environment - and not ignore the detrimental effects. Create clean jobs, not dirty jobs.

The EPA is the only agency that gives me “standing” against the destruction of the environment. Its regulations provide a level playing field - let’s not have “a race to the bottom” by eviscerating the regulations.
