President Trump:

Re: Healthcare

The AHCA is a significant step forward in providing healthcare to all Americans. This is a policy followed by virtually EVERY developed country in the world. The AHCA should be improved, not dismantled.

The underlying provisions of the AHCA are beneficial and important to providing proper healthcare to all Americans. Let's extend it by offering 'single payer' options or providing 'Medicare for all'.

The long-term benefits of AHCA are large, including being able to detect chronic diseases early and offering prevention, rather than letting the diseases fester and grow into untreatable conditions.

Think bigly and humanely, President Trump. Millions of Americans have affordable health-care provided by AHCA - don't take it away.
