

President Donald Trump  
The White House  
1600 Pennsylvania Ave  
Washington DC 20500

President trump\* the Grump:

Re: Susan Rice Allegation

Susan Rice was National Security Advisor for President Obama. She had full access to all information and data that the US Government collects, just like you - and just like your own National Security Advisor.

Under authorized, known and routine surveillance of Russian officials (and others?), the US Government found US citizens talked to these Russian officials. We already know this was going on since the US Government has full transcripts of your former National Security Advisor Flynn discussing sanctions with said Russian official.

Susan Rice asked the appropriate agency to unmask the US citizen to “her eye’s only”; that is not a leak. It is her acting responsibly to determine which US citizen was talking to a surveilled subject. That is not a leak.

You LEAKED classified information by released the person who actually unmasked the name while doing her job responsibly.

At that point, President Obama was President, not trump\*. Flynn is now in violation of the Logan Act. That is a treasonous act.

That was a form of collusion. Then we have the collusion of your campaign working with Russian intelligence to coordinate the Podesta data leaks.

Sally Yates has a story to tell, as well. Of course, you want to distract from the collusion charge re your campaign and Putie.

[Russia is coming.]
